

# Solving your safety problems

PROBLEM - slippery floor surfaces

THE ANSWER

In warehouses, corridors, staircases, shopping malls, office entrances, leisure pools, changing and shower rooms - floors, ramps and staircases combine to provide a Health & Safety nightmare.

With litigation becoming ever present, the duty of care placed on owners to resolve slippery floor surfaces is even more important.

Utilising a wide range of liquid applied coatings; existing floor surfaces such as concrete, steel, timber, ceramic tiles, marble and similar natural stone floors

can receive either clear or coloured safety flooring finishes.

Latest innovations include luminous grip systems to provide enhanced definition at night on stairs.

BCL Applications can advise you on a range of solutions designed to solve your slippery floor problem.

# Solving your safety problems

clear safety coatings with microbial protection  
 for use in kitchens, food preparation areas etc

A slippery floor in a kitchen area is particularly hazardous. Utilising modern floor coating technology, we can provide a slip resistant surface on most ceramic and quarry floor tiles AND by using the microbial cleaner, grease and food spills are biologically broken down.

Contact the experts now for free advice on how to solve your slippery floor problems.
